

Theoretical-practical advanced NON-Surgical periodontal treatment: protocols and new technologies

The theoretical/practical course is designed to train the clinician to be autonomous and confident in the professional use of the most up-to-date anti-infective measures. Each student will play and work with the instruments furnished and he/she can use them on the patient under the supervision of qualified tutors.

Each clinician will have the possibility to share his/her achievements anytime during the course via modern communication tools (videos, photos, presentations, virtual databases). Data collected during the clinical hands-on will be collected and used for future scientific publications.

DIRECTOR Prof. Annamaria Genovesi

COURSE SEAT CLINICA SAN JOAO RUEA CITADE DE BOLAMA 3 R/C,
OLIVARI SUL 1800-077 LISBOA

PRICE € 950 + VAT

The hotel and the flight to reach and leave from Lisbon depends on the learner: the fee does not include any transportation.

The student, author of the best thesis elaborated at the end of the course, will receive the ozone machine: Ozone DTA SWEDEN & MARTINA

PROFESSORS AND TUTORS

SIMONE MARCONCINI, DDS, MSC, PhD

Professor at the Department of Surgical, Medical and Molecular Pathology, University of Pisa, Italy. Research Fellow Tuscan Dental Institute, Foundation for Clinic, Research and Continuing Education in Dentistry.

Author of books and many relevant scientific publications Speaker and coordinator in many national and international conferences. Researcher.

ANNAMARIA GENOVESI RDH, DHA

Professional Dental Hygienist, Director of the Dental Hygiene Unit at the Tuscan Stomatologic Institute (Versilia General Hospital).

Professor at the University Marconi, Rome. Speaker and coordinator in many national and international conferences. Researcher.

ANDREA BUTERA

Professional Dental Hygienist, Professor of different courses in oral hygiene relevant masters.

Speaker and coordinator in many national and international conferences. Researcher. Professor at the University of Pavia.

GIACOMO OLDIOINI

Professional Dental Hygienist, Professor of different courses in oral hygiene relevant masters.

Speaker and coordinator in many national and international conferences.

Affiliation at the Tuscan Dental Institute, Foundation for Clinic, Research and Continuing Education in Dentistry.

CHIARA ATTANASIO

Professional Dental Hygienist, Professor of different courses in oral hygiene relevant masters.

Speaker and coordinator in many national and international conferences.

Affiliation at the Tuscan Dental Institute, Foundation for Clinic, Research and Continuing Education in Dentistry.

DANIELE CENCI

Professional Dental Hygienist, Professor of different courses in oral hygiene relevant masters.

Speaker and coordinator in many national and international conferences.

Affiliation at the Tuscan Dental Institute, Foundation for Clinic, Research and Continuing Education in Dentistry.

Affiliation at the Tuscan Dental Institute, Foundation for Clinic, Research and Continuing Education in Dentistry.

Program

THEORETICAL-PRACTICAL ADVANCED NON-SURGICAL PERIODONTAL TREATMENT: PROTOCOLS AND NEW TECHNOLOGIES

FEBRUARY 2019, 8TH AND 9TH

Friday - Morning session 09:00-13:00

Introduction to modern technologies available to the dental hygienist:

- Laser
- Ozone
- Probiotics
- Anti-oxidant mouth-rinses
- New-generation sonic hand-pieces
- Glycine powders
- Oral Health and The Balanced Microbiome
- The importance of the microbiome dynamic equilibrium
- The rationale behind patients' preparation to surgery
- Oxidative stress and its consequence for Oral Health

Friday - Afternoon session 14:30-18:00

Hands-on on patient

- The initial approach:
 - Motivation explained
 - Extra- and Intra- oral examination of the patient.
 - Periodontal Modern Charting and anamnestic questionnaires. Photography session (the learner should bring his/her own camera).

Saturday 9:00-13:00

Periodontal treatment on patient

MARCH 2019, 8TH AND 9TH

Friday - Morning session 09:00-13:00

Discussion of clinical cases

Friday - Afternoon session 14.30-18.00

Treatment of peri-implant patients

Saturday – Morning session 9:00-13:00

Revaluation of clinical cases
